Claims 1- 4 are objected to because of the following informalities: These claims, either in themselves or through their dependency, contain more than one period (see MPEP 608.01(m)). Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Moore, III et al.

The reference discloses methods of conforming an insole to a persons foot comprising heating in a microwave oven, inserting into a shoe and having the wearer insert their foot into the shoe. Applicants' claim language regarding the limitation to covering the insole and dipping in hot water is seen as describing an optional step.

Therefore the reference anticipates the rejected claims.
